

# Envision Resilience Nantucket Survey

## Client

ReMain Nantucket

---

## Facts

Period

2020

Project Country

United States

---

**EBP is designing, implementing, and evaluating a two-part survey of attitudes towards climate change, resilience, and adaptation on Nantucket.**

The survey effort will allow our client—ReMain Nantucket—and their partners prepare for and evaluate the impacts of the [Envision Resilience Nantucket Challenge](#). The challenge is a design studio in which interdisciplinary teams of graduate students will reimagine Nantucket Harbor under the latest projections of sea level rise. In doing so, the students will work with local and regional advisors in conservation, public works, real estate, architecture, historic preservation, natural resources, art, marine biology, fisheries, civil engineering, science, and transportation.
