Safety and Economic Impact Benefit for Michigan SR127

Client

Gratiot County Development Corp

Facts

Period 2018

Project Country United States

EDR Group (now EBP) assessed effects of design limitations of US 127 in Central Michigan on safety and ultimately also the regional economic development potential of the section of the highway between St. Johns and Ithaca. The project focused on development of economic valuations for safety and broader job and income implications. It was used to support inclusion of planned improvements in Michigan's forthcoming Statewide Transportation Improvement Program (STIP).
